

THERE ARE BOATS. AND THERE ARE BRUNSWICK BOATS.

Tough missions call for tough boats. That's why boats built by Brunswick Commercial & Government Products (BCGP) are intended only for commercial use. We don't harbor any recreational boats in our lineup. So at the BCGP factory you'll see nothing but boats specifically designed and built for the rigors of commercial use. From heavy-duty laminate schedules to stainless steel deck fixtures, we deliver your agency a vessel that's mission-ready in every detail.

Don't hold back. Spec out your dream boat. Choose from our Boston Whaler lineup, our Impact RHIB family or our Sentry aluminum fleet, and from thousands of options for every model. Or let us customize your boat for you. That's the Brunswick Benefit: We don't say no. You get a fully customized boat built to protect and serve, not to take on the family fishing trip.

Just like you, boats are our full time job. For more than 50 years, we have focused solely on building the toughest, finest boats for law enforcement, special forces, fire departments and workboat operators worldwide. So, now, do you want a boat? Or do you want a Brunswick?

LAW ENFORCEMENT

THE BOAT EVERY GETAWAY DRIVER HATES.

You enforce the line between the bad guys and the citizens, day or night, in calm or storm. There's no such thing as a routine patrol, so you count on your gear, your instincts and your boat to be ready for anything and anybody at any time.

That's why BCGP boats are built for long, hard shifts. We designed the boat to be labor-saving and ergonomic, putting crucial controls right at hand, ensuring you have everything you need while responding to a call. Our unsinkable Boston Whalers patrol offshore in big water or can dart in and out of tight inland shallows. A favorite of law enforcement and first responders, the stable and forgiving Brunswick Impact RHIB diminishes damage and wear with repeated boarding of other boats. And our durable Sentry aluminum models with enclosed helms keep rough weather from slowing down the rescue – or the chase.

FIRE RESCUE

THE BOAT YOU'RE IN WHEN YOU'RE IN IT TO SAVE LIVES.

Boaters get themselves into trouble and count on you to get them out. And a blaze can turn into an inferno inside a few seconds on the water. So, when a minute's delay means lives and property, serious fire and rescue professionals bring the Brunswick.

The unsinkable Boston Whaler puts dive and rescue doors just inches from the waterline to let divers enter the water and bring the victims on board faster, and the deck can easily accommodate a treatment area for multiple patients. Shock-absorbing collars make the Brunswick Impact RHIB easier on your dive and rescue gear and protect it alongside subject vessels.

And when the mission calls for it, snuff that fire with a full range of firefighting capacities, up to 1150 GPM from a single pump. Our fireboat design expertise will help you spec out the perfect firefighting machine. Choose from thousands of options for customization, including fire pumps, crash rails, lights and tank racks – everything you need to get the job done.

MILITARY

THE BOAT THAT TAKES THEM IN, BRINGS THEM HOME.

When your op is life-critical – and when isn't it? – never bring less boat than you'll need. Bring the Brunswick and you'll never experience a second's hesitation for lack of speed, rugged performance or the capacity to take personnel – and punishment.

Our extra-durable hulls and mission-specific equipment options are battle-tested, with combat experience going back to the Vietnam War. The seasoned experts who run our sales and support forces understand the critical nature of your mission and help you build the ultimate ops vessel.

Our whole line is prepared for any special ops challenge you take on – the unsinkable Boston Whaler, durable aluminum Sentry and rigid-hulled Impact. Tackle rough seas or snake through shallow rivers in a boat you know will get your team in and out, mission accomplished. Just fit the boat to your application. Many of our models fit into C-130s or sling under helicopters for remote missions. And U.S. forces can order straight off GSA. We'll help you spec it out. We'll even train you to maintain your fleet.

COMMERCIAL WORKBOAT

THE BOAT YOU CHOOSE IS YOUR BUSINESS.

We get it. It's not a boat. It's your business. You need a full-time boat for your full-time job. No cutting out early or calling in sick. Whether it's ferrying to the offshore rigs, bringing in the big catch or diving from a research platform, there's a Brunswick fiberglass, rigid-hull inflatable or aluminum vessel to get the job done. Your job. So don't depend on a makeshift that was designed for lighter duty.

Instead, select from Brunswick's commercial RHIB, center-console or enclosed-cabin designs. With hundreds of configuration and equipment options, plus the Brunswick team's expertise, you can create the perfect commercial boat to deliver the job, all the way, on time. Then count on BCGP's technical support team after the sale to ensure you're operational without commercial interruption.

BOSTON WHALER

ANYTHING LESS THAN UNSINKABLE IS UNTHINKABLE.

BOSTON WHALER

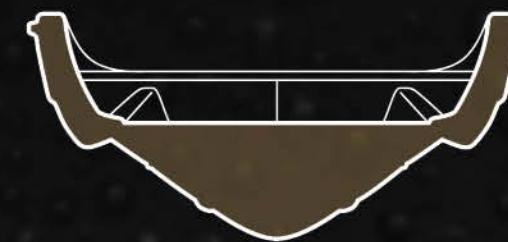

The claim is watered down by lesser boats that call themselves unsinkable but come up short.

Only the legend remains truly unsinkable. Cut a commercial Boston Whaler in half with a chainsaw (we have) and not only does it not sink, you can still drive it. Even fully swamped, under the worst, repeated abuse – intentional groundings, punctures by submerged objects, and collisions in dense fog – this boat floats. On actual missions, Boston Whalers have returned their crews safely to shore with a three-foot hole in the bottom, a crushed bow, or even having been sliced completely in half.

Its foam-core Unibond™ construction gives the Whaler its unsinkability – up to 2½ times the flotation required by the U.S. Coast Guard. No other commercial boat has it. Built with two precisely engineered molded hull pieces fitted together and filled with our proprietary foam, Boston Whalers are fused together to create an unsinkable unified hull. Advanced engineering and high-grade materials give the Boston Whaler a service life and warranty measured by the decade instead of by the year.

We'll fit any commercial Boston Whaler in our extensive lineup to suit your mission. From firefighting to inland water patrols, workhorse to special ops. Lives depend on your boat. Why think of bringing anything less than a Brunswick?

- 316-L stainless steel deck hardware
- Reverse chines
- Unsinkable fiberglass construction
- Foam core
- Unibond construction
- Tinned copper wiring
- Self-sealing, heat-shrink-insulated connectors

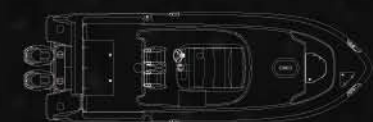

Unibond Construction

The unsinkable foam-filled Unibond hull. Two precision-molded halves are fused together with proprietary foam into a unified, virtually indestructible hull.

GUARDIAN

The Guardian's **center console design** and classic unsinkable fiberglass hull are built for heavy loads. Its simple, no-nonsense design lets you focus on the mission. The **user-friendly walk-around deck** allows adaptive operation – making it the most versatile workhorse on the water.

BOSTON WHALER

JUSTICE

The Justice offers a **deep-V hull and center console design** making it well suited for offshore patrols. Whether navigating high-traffic areas or plowing through big waves, the Justice series of boats shines in less than ideal conditions because of its **higher free board and pronounced chine** translating into a softer, drier ride.

BOSTON WHALER OPTIONS

Standard features and options for every Boston Whaler model, the Guardian, Justice, Vigilant and Challenger, make your Boston Whaler all yours. Custom-spec your Whaler for your exact application from the many available options – just a few are shown here. Work with your Brunswick team for special-purpose equipment, custom options or mission specific requirements.

CANVAS WEATHER CURTAIN SYSTEM

Optional for the heavy-duty T-top. Completely encloses the operator with forward, rear, port and starboard drop curtains. Composed of rugged acrylic material with non-corrosive zippers and snaps.

HEAVY DUTY T-TOP

Marine-grade canvas cover and high-grade aluminum tubing with powder-coated finish.

FIBERGLASS HARD TOP

Infused fiberglass hard top with heavy duty aluminum frame.

ALUMINUM CONSOLE

Welded aluminum console powder coated to match interior hull color. Features shown in pictured console will vary according to options selected.

ALUMINUM SHOTGUN LEANING POST

30-36" with backseat, lockable storage and footrest.

REMOTE CONTROL SPOTLIGHT

Choice of 200,000 or 80,000 CP.

LED LIGHTBARS AND SIRENS

Lightbars can be custom configured with sirens, PA and amplifier.

FIRE PUMP OFFERINGS AND INSTALLATIONS

Chose from 21 HP, 55 HP or 135 HP.

STAINLESS STEEL CUTWATER

Heavy-duty 1/16" stainless steel plating is shaped to fit keel. Designed to protect keel from damage during beaching.

RESCUE RAILS

Rugged 1" powder-coated aluminum rails feature welded construction, oversize mounting and backing pads, and stainless steel bolts. When dive door is ordered, rail is split.

HIGH/LOW BOW AND SIDE RAILS

Heavy-duty welded aluminum pipe. Rails secured to hull with stainless steel machine screws tapped into 1/2" phenolic inserts laminated into the hull.

EXTRA HEAVY DUTY RUBBING STRAKES

Choice of horizontal or vertical. Flexible enough to absorb impact. Protects hull when lying alongside ships or low piers.

ENGINE CRASH RAIL

Powder-coated aluminum to protect the engines and boat while towing.

SHOCK MITIGATING SEAT

Various brands and configurations available. Consult with sales representative to select seat that meets mission requirements.

PUSHER KNEE

Integrated aluminum pusher knee.

TOW POST

Aluminum tow post designed to support towing applications.

DIVE / RESCUE DOOR

Mere inches from the waterline so you can easily retrieve victims or divers.

DIVE TANK RACK

Welded aluminum or removable racks, mounted in the cockpit or bow area, can hold 3 or 6 bottles.

IMPACT

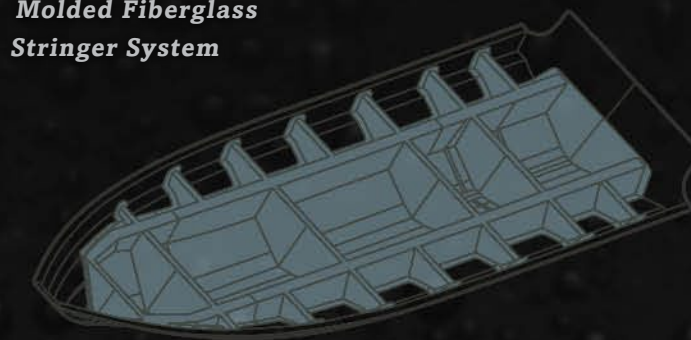

YOU HAVE TO MAKE AN IMPACT. THAT'S WHY WE DO.

Nobody questions your intentions when you show up in one of these. The signature Brunswick rigid-hull inflatable boat (RHIB), the Impact does nothing to discourage its rep as a special ops heavy hitter. Fast. And tough, starting at the core. Most RHIBs use conventional, separate stringer blocks. All Impact models feature a molded one-piece fiberglass stringer system, adhered to the hull with a bond that's stronger than the fiberglass itself, and filled with polyurethane closed-cell foam for added strength and flotation.

The Impact's air- or foam-filled collars act as shock absorbers to mitigate damage during a collision or tied alongside another boat or dock, and give the driver lateral stability and quicker recovery in stacked waves. Affix to a fiberglass hull, and you get the best of both – the strength, durability and imperviousness of the hull with the impact absorption of the collar. The light weight and great engine capacity of the RHIBs stretch your operational range and cut your time-to-plane with speed that'll push you right back in your seat.

- BCGP hulls feature multi-directional fiberglass cloth and a polyester blend resin in a precise ratio to achieve maximum strength with minimum weight
- Heat-welded, air-holding collar seams yield superior longevity
- Standard collar features include heavy-duty rubbing strake fenders and heavy-duty inflation and pressure-relief valves
- Aggressive nonskid surface is applied to collars and molded into fiberglass decks for more secure footing

Molded Fiberglass Stringer System

IMPACT

Impact RHIBs are perfect for security and patrol applications: **responsive and stable** in rough conditions, yet maneuverable in tight quarters. Its shock absorption and lateral stability in rough seas allow the Impact to track brilliantly at high speed. The air- or foam-filled collars are ideal for coming alongside other vessels and are well suited for dive and rescue applications. Our models range from 15 to 39 feet, each with a wide array of layouts and options to customize to your exact mission.

IMPACT

IMPACT D-COLLAR

The Impact D features a **hybrid air/foam-filled collar** mounted to a **solid fiberglass gunnel**. Instead of a fully circular tube, our Impact D-collar allows for more space on deck and added maneuverability and versatility for the crew. The D-collar gives customers the best characteristics of a standard fiberglass hull with the benefits of an RHIB. Law enforcement finds this design especially suited to tactical maneuvers, where boarding another craft may be necessary.

Draft 18" / 46 cm
Deadrise 22°

Boat weight* 3600 lbs / 1632 kg
Weight capacity 4043 lbs / 1833 kg
Fuel capacity 150 gal / 567 L
Person capacity 17

Max horsepower 500 hp / 373 kW
Min horsepower 300 hp / 233 kW
Max engine weight 1400 lbs / 635 kg
Transom height 30" / 76 cm

750

LOA 22' 11" / 7 m
Beam 10' / 3.05 m
Draft 18" / 46 cm
Deadrise 22°

Boat weight* 3000 lbs / 1360 kg
Weight capacity 3597 lbs / 1632 kg
Fuel capacity 150 gal / 568 L
Person capacity 15

Max horsepower 400 hp / 298 kW
Min horsepower 200 hp / 149 kW
Max engine weight 1060 lbs / 481 kg
Transom height 30" / 76 cm

*Base Boat, No Engines, Dry

IMPACT

IMPACT OPTIONS

Shape the industry's toughest RHIB to your mission. Rig your Impact or Impact D-collar for extra deck space and even heavier punishment. Integrate large-caliber armaments and a welded aluminum console. Add comfort to ruggedness with shock-mounted seats and cushioned floor matting. Your Brunswick team knows every possible combination of options to maximize your Impact.

ALUMINUM CABIN

Welded aluminum cabin can be customized to fit your mission. Contact your representative to determine the optimal cabin configuration for your vessel.

ALUMINUM CONSOLE

Welded aluminum console powder coated to match interior hull color. Includes integrated handrails, a large electronics flat or enclosure, and locking aluminum access door. Features shown on pictured console will vary according to options.

ALUMINUM T-TOP

High-grade welded aluminum, integrates with aluminum console. Customization available.

FIBERGLASS HARD TOP

Infused fiberglass hard top with heavy-duty aluminum frame.

BOW BOARDING RAILS

Removable bow boarding rails allow ease of access when boarding other vessels.

ALUMINUM SHOTGUN LEANING POST

36" leaning post with gun rack and storage.

STAINLESS STEEL CUTWATER

Heavy-duty 1/16" stainless steel plating is shaped to fit keel. Designed to protect keel from damage during beaching. Hull has additional laminate for installation and extra strength. Available on most models. Powder-coated black. Factory installed only.

ENGINE CRASH RAIL

Powder-coated aluminum to protect the engines and boat while towing. All-welded construction prevents water intrusion and provides superior strength.

SHOCK-MITIGATING SEATS

Various brands and configurations available. Consult with sales representative to select seat that meets mission requirements.

BOW GUN MOUNTS

Aluminum gun mounts. Other optional weapons mounts available. Please contact your representative to learn more.

TOW POST

Aluminum tow post designed to support towing applications.

STAINLESS STEEL BOW EYE REINFORCEMENT

Heavy duty 1/8" 316-L grade stainless steel plating is shaped to fit keel in bow eye location. Designed to prevent bow eye from loosening during towing operations. Hull has additional laminate for installation and extra strength.

FLOOR MATTING

A cushion-type mat that covers the floor using 1/2" thick matting. Open pattern allows water to drain through matting and aft into drains. Connected with special connectors.

INBOARD ENGINE CONFIGURATIONS

Contact your representative to determine optimal engine configuration.

OUTBOARD ENGINE CONFIGURATIONS

Contact your representative to determine optimal engine configuration.

WING COLLAR OPTIONS

Designed and produced by WING Inflatables in California. Contact your representative to determine the best option for your vessel.

LAW ENFORCEMENT OPTIONS

Chose from lightbars, sirens, amplifiers and spotlights.

FIRE PUMP OPTIONS

Chose from 21 HP, 55 HP or 135 HP.

SENTRY

RUSHES INTO WATER WHERE OTHERS FEAR TO TREAD.

When you need an aluminum boat to complete your fleet, get one built to the Brunswick standards you already know and trust.

Brunswick CGP has been building commercial boats for over 50 years, and now offers aluminum cabin boats. Our Sentry aluminum boats withstand extraordinary abuse in rugged waters where submerged rocks and logs wreak havoc on lesser hulls. They resist fire and contaminated water – where you really don't want to compromise on hull material. But it's their exceptional strength and ability to accommodate powerful propulsion that make them particularly well suited for commercial applications, taking your operation high-speed, while you operate from an insulated cabin with 360-degree visibility.

The Sentry cabin boat series ranges from 30 to 40 feet in length. Every model is designed for high performance, 360-degree visibility and aluminum durability. Other aluminum boats are loud and uncomfortable because the bare metal hull amplifies noise and vibration. But the Sentry series features insulated cabins and shock-mitigating seats to make your job a lot more tolerable, if not downright pleasant.

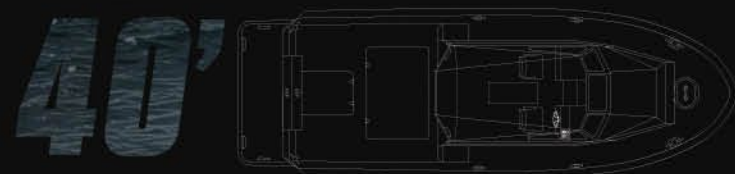

The adaptability of the Sentry line allows you to build a fully customizable work platform. Features and options include:

- Saltwater-grade 5083 aluminum alloy for superior corrosion resistance
- Insulated and enclosed helms featuring 360-degree visibility
- Forward cuddy cabin for comfort during extended patrols
- Inboard or outboard engine configurations
- Shock-mitigating seats

SENTRY

SENTRY

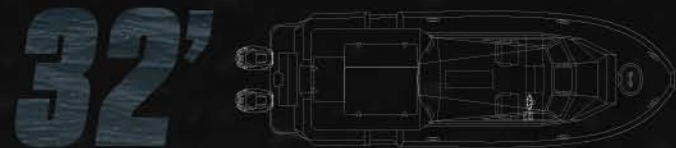

The Sentry brings **aluminum strength, durability and agile operation** to commercial applications, search and rescue, special operations, and patrol. BCGP offers a range of top-quality aluminum platforms while giving you the flexible boat to match your mission. The hulls are designed and fabricated from top-quality aluminum structure by teams with years of aluminum experience. Assembly is completed at BCGP's manufacturing facility based on your specifications.

SENTRY OPTIONS

The virtually unlimited combinations of options make the Sentry's versatility match its durability – while it precisely matches your mission. Create a multi-mission craft that combines specific applications. Work with your Brunswick expert to configure maximum storage, weather protection, heavy hull equipment and custom paint.

WATERJET PROPULSION SYSTEM

With swim platform. Contact your representative to determine optimal engine configuration.

AFT SUNTENT

Integrates with aluminum cabin, available in different colors and sizes.

CUSTOM CABIN CONFIGURATIONS

Contact your representative to determine the optimal cabin configuration for your vessel.

ALUMINUM WORK STATION

Available for customization to fit mission specifications.

STARBOARD SIDE GUN LOCKERS/STORAGE BOX

FORWARD CUDDY CABIN

ALUMINUM DIVE LADDER

Custom built to integrate with Sentry dive door.

SHOCK-MITIGATING SEATING

Various brands and configurations available. Consult with sales representative to select seat that meets mission requirements.

ROOFTOP A/C

Up to 24,000 Btu.

YOU HAVE YOUR MISSION. WE HAVE OURS: YOU.

When we say “Bring the Brunswick,” we’re talking about more than the boat. Our expert, experienced, dedicated customer service teams really bring it. We stand behind the boats that you – and the people you serve – depend on. Not only does your Brunswick come with a multi-year limited hull warranty, but we’re there for the life of your boat, too. Where Boston Whalers are concerned, that can easily mean well past the 10-year warranty.

Contact your Brunswick representative for more information on our complete custom capabilities. There’s no job a Brunswick can’t handle or that we can’t equip it for.

FACTORY REFURBISHMENT AND TRAINING

Our specialized refurbishment service will clean, repair and update to add years of service to your existing Brunswick fleet. And factory training courses for your personnel cover boat operations, general maintenance and fiberglass repair.

FACTORY REPUTATION

Ask anyone who’s owned or operated a Brunswick commercial or military-grade boat. We build stronger customer relationships before, during and after the sale with the support of the largest marine manufacturer in the world. For more than 50 years, we’ve supplied top-tier products to customers who need the toughest boats they can get. They never second-guess a mission. They bring the Brunswick.
